

Ebuka Ezeh

Frontend Engineer

A senior frontend engineer with a strong focus on performance, architecture, design systems, and user experience. Over the past 10 years, I have led and contributed to large-scale projects, driving technical excellence and design consistency across teams. I take pride in bridging the gap between engineering and design, building scalable, maintainable systems that deliver intuitive and visually refined user experiences. My approach combines technical leadership with a deep understanding of product strategy to create lasting impact.

Skills:

- Component driven architecture
- Tooling and testing
- Cross browser compatibility
- Web performance optimization
- Design systems
- Accessibility
- Internationalization
- API and backend integration
- Authentication and authorization

Core Tools:

- TailwindCSS
- TypeScript
- React + Next
- Vue + Nuxt
- REST APIs + GraphQL
- Node + Express

Work Experience:

Founding Frontend Engineer (part-time)

RELIO - getrelio.com

October 2022 - Present

- Relio helps organizations track their APIs from source to runtime.
- Collaborated with cofounders to accelerate the MVP, contributing to both design and engineering efforts.
- Developed and implemented an API graph for efficient tracking and analysis of API endpoints.

Senior Frontend Engineer

ATLAN - atlan.com

April 2021 - September 2022

- Atlan is a modern data collaboration workspace for data teams (like Figma for design). It creates a single source of truth for all their data assets.
- Led the Data Lineage Graph Experience and Infrastructure on the frontend, implementing column level data lineage.
- Designed and deployed a new DAG structure that reduced graph nodes by 50%, significantly improving load times.
- Built a caching system for all graph interactions, improving user experience and load efficiency by over 50%.
- Developed horizontal and vertical pagination for graph nodes through optimized server and client data fetching.

Frontend Lead

MEDHERD - medherd.com

April 2020 - April 2021

- Medherd is transforming the way digital health products are tested, approved, and prescribed - through physician-driven reviews and recommendations.
- Designed, implemented, and maintained the web app, landing, and marketing pages while driving continuous improvements.

Frontend Engineer (contract)

ALTA LABS - altalabs.io

April 2019 - March 2020

- Alta Labs helps both startups and established players unlock hidden potential with the power of technology.
- Designed, implemented, and maintained ¹web applications for multiple client projects, focusing on performance optimization, responsive design, and smooth user experiences.

Frontend Engineer

PAYSTACK - paystack.com

January 2019 - March 2019

- Paystack helps businesses accept online and offline payments from anyone, anywhere in the world.
- Collaborated with product designers and backend engineers to improve the usability and performance of customer-facing payment flows.
- Contributed to refactoring core UI components for better modularity and scalability across multiple merchant dashboards.
- Enhanced accessibility and responsiveness of the checkout experience to align with modern web standards.
- Participated in code reviews and implemented UI performance optimizations that improved load times across key product pages.

Frontend Engineer

ATLAS HOLDINGS INC - atlas.money

May 2018 - December 2018

- Atlas connects people who want financial services with the people who can provide them.
- Proposed and implemented new ideas, process improvements, and modern technologies that enhanced efficiency in the development life cycle by 38 percent.
- Developed the merchant facing dashboard for a Fintech product using VueJS, resulting in improved performance and faster response times.
- Collaborated with internationalization teams to ensure new and existing pages were localized for a smoother and more inclusive user experience.

Freelance Web Developer

FREELANCING

April 2014 - April 2018

- Optimized performance, accessibility, and SEO across multiple projects to improve engagement and usability.
- Managed all stages of the development lifecycle: prototyping, coding, testing, deployment, and ongoing maintenance.

Education:

Bachelor Of Technology, Mathematics (B.Tech)

FEDERAL UNIVERSITY OF TECHNOLOGY, OWERRI - futo.edu.ng

October 2014 - December 2019
